

Commentary

Global equity strength continued in June (+4.1%) led by the Technology and Energy sectors, while Materials and Financials underperformed. US equities (+5.5%) outperformed amidst the continuation of friendly policy from the US Federal Reserve despite the emergence of more hawkish tones. European equities underperformed (+1.1%) as the continent continued to catch up with its vaccination rollout.

Asian equities were stable (+3.0%) with Japan (+1.7%) underperforming, while Chinese equities were positive despite their continued regulation on internet names and commodity prices (+3.4%).

Elsewhere, Brent Crude (+10.8% in USD) continued its rally, while Gold underperformed (-7.2% in USD) and the US Dollar (DXY +2.9%) was stronger driven by the US macroeconomic backdrop.

Key contributors included:

- Software/Internet - Developed Markets cluster, notably Microsoft amidst continued strength in the company's cloud services business, Facebook as a US federal court dismissed the Federal Trade Commission's antitrust lawsuit, and Roku as they announced a record two-week streaming period from the launch of original content.
- Software/Internet - Asia/Emerging Markets cluster, notably Meituan after reporting strong growth in food delivery, supporting its dominant market status. JD.com experienced an increase in sales from the prior year from

the 618 shopping festival in China with over 80% of new users coming from lower tier cities.

- Healthcare cluster, notably Merck following the presentation of impressive data at a medical conference (ASCO), supporting its oncology therapy pipeline, and as major pharmaceutical stocks rebounded after a period of underperformance.
- Exxon, in our Energy cluster, continued its upward trajectory in tandem with rallying crude oil prices and increased investor confidence in de-risking the long term strategy following the successful election of new board directors with specialisations in decarbonisation.

Key detractors included:

- Consumer Cyclical - Asia/EM cluster including Trip.com after a brief resurgence of COVID-19 cases in the Guangdong region in China raised concerns of delays to the establishment of travel bubbles. Financials, including KB Financial, underperformed as the consensus on rising rates was challenged after bonds rallied on concerns that the recovery trade may not be as linear as expected.
- Volkswagen in the Industrials cluster after a sustained period of outperformance over the prior two quarters.
- Newcrest Mining on the weakness in gold.

¹All metrics are based on gross of fee returns in AUD terms. The upside/downside capture ratio is the percentage of benchmark performance captured by the fund during months that the benchmark is up/down. Standard deviation is a measure of risk with a smaller figure indicating lower return volatility. The Sharpe ratio measures returns on a risk adjusted basis with a figure > 1 indicating a higher return than the benchmark for the respective levels of return volatility
