

AUSTRALIAN FIXED INTEREST FUND

As at July 2023

Fund objective

The Fund seeks to achieve a total return after fees that exceeds the total return of the Benchmark, over rolling three-year periods.

Investment approach

The Fund is an actively managed portfolio of high quality interest bearing securities that seeks to provide a high level of capital protection. The Manager's investment approach is fundamentally driven and seeks to take advantage of situations where market pricing has become misaligned with economic and investment fundamentals. The Manager seeks to add value to the benchmark using a combination of active strategies including duration and yield curve management, sector allocation and security selection.

Jay Sivapalan

Fund performance

The Janus Henderson Australian Fixed Interest Fund (Fund) returned 0.58% (net) and 0.61% (gross). The Fund outperformed the Bloomberg AusBond Composite 0+ Yr Index (Benchmark) by 0.06% (net) in June, which returned 0.52% over the month. The Fund continues its outperformance, beating the Benchmark over the longer term including by 0.60% (net) over the year, and 0.19% (net) since inception per annum.

The fall in bond yields in the month generated positive capital returns for longer duration bonds. This was coupled with higher levels of income. We cautiously added duration towards the end of June when rates lifted above our assessment of fair value. This overweight to duration was a positive contributor to performance in July as yields came off their highs in the aftermath of the CPI figures which indicated an easing in inflationary pressures.

We hold an overweight position in semi government bonds, mostly via New South Wales, as well as overweight swap yields over government bond yields. The fall in yields benefitted these positions while on a relative basis to government bonds the spread was broadly unchanged.

It was a good month of outperformance from credit, returns benefitting from both additional income and some spread tightening. Overweight credit allocations were a positive contributor as a result.

Overall, the Fund outperformed versus the Benchmark during a strong month for bonds. A cautious overweight duration position was a positive contribution as we built up positions to 0.7 year overweight vs the Benchmark to take into the month.

More recently, the Fund has also been active in de-risking into the spread rally, adding some credit protection at cheapened levels, and taking profit on credit with plenty of capacity to add again into weakness.

Market review

As central banks edge closer to their policy peak, markets are starting to hope that the inflation genie is back in the bottle, without much detriment to economic growth. This allowed for some divergence across bond tenors. Shorter dated markets see a near term peak in policy, but policy held steady for longer, while longer dated markets eased long term risks. Three-year government bond yields ended the month 18 basis points (bps) lower at 3.87%, while 10-year government bond yields were 4bps higher at 4.06%.

AUSTRALIAN FIXED INTEREST FUND

The RBA are now monitoring the balance between the slowing household sector, the strong labour market, and high wages growth.

Source: Bloomberg AusBond Indices
Period of 1 July 2023 – 31 July 2023

Market Outlook and Investment Strategy

The RBA are now monitoring the balance between the slowing household sector, the strong labour market, and high wages growth. We know that the labour market lags the economy, reflecting the monetary policy conditions seen almost a year before, but the turn is difficult to pinpoint. We remain in the midst of the peaking of the economy but believe that policy will continue to grip and slow economic growth, with a shallow recession starting early next year not off the table.

We have reduced the probability of the very last hike in the cycle, with our central case now seeing one more hike to 4.35%. This may come through in either of the next two meetings. However, the longer the RBA leave it, the worse the coincident economic data appears and the harder it is for them to raise rates to tackle inflation. We currently see market pricing of one more rate hike, but delayed until 2024, and then policy held for an extended time, as underestimating the economic headwinds in 2024. We currently see the Australian yield curve as modestly under-valued. We remain on the lookout for tactical opportunities to add further duration on spikes in yields triggered by central bank signalling and data flows.

As the cumulative impact of tighter financial conditions continues to grip and the cycle ages, our focus in the credit space is towards defensiveness, with a keen focus on risk-adjusted returns. Our strong bias is towards high-quality, liquid credit and issuers that can survive and thrive through a range of macro-economic scenarios.

We are avoiding illiquidity, complexity and leveraged sectors, where we anticipate balance sheets will have to contend with a painful period of adjustment in a higher cost of capital environment. Lastly, by adopting a patient and disciplined approach to extending risk and reserving ample investment capacity we will be well placed to take advantage of any further market dislocations.

AUSTRALIAN FIXED INTEREST FUND

(continued)

Domestically, primary markets were generally quiet in July, which included only a few labelled ESG bond deals.

Environmental, Social and Governance (ESG)

Domestically, primary markets were generally quiet in July, which included only a few labelled ESG bond deals. Two were small private placement new green bond issues, both from supranationals, however we were able to access the two following deals for clients via primary markets. NZ Local Government Funding Agency (NZ LGFA) helps to fund the local councils across New Zealand, who provide services such as public transport, public housing, water treatment, and recycling collection. They also have a strong sustainability framework which can lend funds to borrowers at a discounted loan margin when they commit to address greenhouse gas (GHG) emissions aligned to science-based trajectory. During July they chose to issue a non labelled bond in Australian Dollars. LaTrobe University issued their inaugural green bond on the last day of July. As well as their social impact through research and education, the University is committed to implementing, maintaining and continually improving environmental management processes to reduce its environmental footprint. Proceeds of the bond can be targeted toward projects aligned with green buildings, renewable energy, energy efficiency, clean transportation, pollution prevention, sustainable water and waste management as well as terrestrial and aquatic biodiversity conservation.

Important information

The Product Disclosure Statement for the Fund, dated 30 September 2022, and the Additional Information Guide, dated 30 May 2023, are available at www.janushenderson.com/australia.

Past performance is not a reliable indicator of future performance. Performance source: Morningstar, Janus Henderson. Performance figures are calculated using the exit price net of fees and assume distributions are reinvested. The Gross performance methodology was updated at the end of March 2020 to reflect the Gross return to be Gross of Management costs and Sell Spread. Due to rounding the figures in the holdings, breakdowns may not add up to 100%.
