FUND UPDATE

The Advance International Equities Multi-Blend Fund returned 4.89% in July, underperforming the MSCI World ex-Australia Index by 1.51%. Global equities rose strongly in July, as many markets rebounded from deep losses made over the last few months amid signs that inflationary pressures were easing, and corporate earnings might not be as bad as feared. Growth led market performance over the month, following comments from the Fed alluding to a reduction in the pace of rate hikes.

Against this background, T. Rowe Price was the top contributor to relative performance. The strategy invests in companies with potential for accelerating returns on capital. This leads to growth bias in the fund, which was rewarded as growth meaningfully outperformed value over the month. Conversely, Wellington Global Opportunistic Value was the largest detractor. The fund invests in companies that have been sharply discounted by the market due to investor bias in dealing with uncertainty. In addition to the style headwind from value's underperformance, stock selection detracted over the month.

From a country perspective, strong stock selection in the United Kingdom was the top contributor to relative performance, while the fund's underweight exposure to the US and negative stock selection within the country, was the top detractor. On a sector level, effective stock selection in Health Care was the top contributor to relative performance, whereas negative stock selection in Consumer Discretionary was the largest detractor. From a stock perspective, the underweight to Johnson & Johnson was the top driver of relative performance whereas the underweight to Apple was the largest detractor.

- 1 The Management Costs included in this fact sheet are inclusive of the Management Fee and any Performance Fees and includes the effect of GST (net of RITC). They do not include other indirect costs. Refer to the Product Disclosure Statement and online disclosures for further information.
- 2 Past performance is not a reliable indicator of future performance. The Fund performance is net of management costs and relates to the wholesale class of investment only. If you are an investor in the retail class of investment, you can obtain up to date returns at advance.com.au. Growth and Distribution returns may not equal the Total Net return due to rounding.
- 3 Allocations may not equal 100% due to rounding.
