Time to liquidate	% of assets
<10 Days	100%
>10 to 21 days	0%
> 21 days	0%

Leverage ratio

WaveStone uses leverage to increase the exposure of the Fund to investment markets. Leverage can be obtained by either of the following methods:

- Using derivative instruments to increase the Fund's investment exposure beyond the net asset value of the Fund; or
- Borrowing a share to sell on the market (short selling); or
- Borrowing cash to invest.

WaveStone will use leverage as an investment strategy predominantly through short selling and using derivatives.

Short positions are taken on particular stocks where WaveStone believes a security is overvalued and it is expected that these stocks will fall in price, or for hedging purposes. Short selling will also increase the Fund's total gross effective exposure to the share market above 100% of its net asset value.

The Fund may have gross exposure of up to 250% of net asset value (NAV), including up to 100% in short positions and 150% total in long positions.

The Fund has the ability to borrow up to a maximum of 50% of the Fund's net asset value. The level of borrowings employed by the Fund have historically been and is anticipated to continue to be around 0-20% of the net asset value of the Fund. Borrowings undertaken by the Fund may be undertaken through the prime broking relationship with UBS AG, Australian Branch. The Fund must provide collateral to secure its obligations under the relevant Customer Documents.

As at 30 September 2022, the Fund is long 109.2% and short 7.5%; gross leverage is 116.7% and net leverage is 78.6%.
