

Robeco Emerging Conservative Equity Fund (AUD)

As of 31 August 2021

Robeco Emerging Conservative Equity Fund (AUD) invests through the Luxembourg domiciled fund Robeco Emerging Conservative Equity in low-volatile stocks in emerging markets across the world. The fund's long-term aim is to achieve returns comparable to those on emerging-markets stocks, but at an expected lower level of downside risk. The selection of these low-volatile stocks is carried out using a quantitative model, which ranks stocks in a variety of ways, including market sensitivity, volatility, distress risk, valuation and sentiment.

Investment Objective

The objective of Robeco Emerging Conservative Equity Fund (AUD) is to deliver long-term equity returns at an expected lower risk than that of a market capitalisation weighted index. It aims to achieve a higher Sharpe ratio than equities in the long term. The fund invests in stocks that show lower volatility combined with good upside potential. It combines the outcome of a stock selection model with a disciplined portfolio construction algorithm. This prudent investment approach results in a low turnover portfolio of low-volatile stocks with low valuation and positive market sentiment.

Manager's Comments

Performance

The conservative equities that the fund typically selects as part of its investment strategy outperformed the market last month. From a factor perspective, low-risk contributed positively, while Value and Momentum had a slightly negative impact. Positive effects came from avoiding the negative returns of Alibaba and Naspers. Contrarily, the underweight in Taiwan Semi and not holding Meituan had a negative impact. Outside of these stocks, most other single-stock effects were limited in August.

Expectation of Fund Manager

The Emerging Conservative Equities Fund (AUD) invests in low volatility stocks with lower expected downside risk and good upside potential. The more stable stocks tend to be overlooked by investors, though they offer relatively high returns given their risk profile. We expect the fund to do particularly well during down markets and volatile market conditions. In a very bullish environment, the fund could lag the overall market, yet still deliver good absolute returns. In the long term, we expect stable equity returns and high income with considerably lower downside risk.

ESG integration policy

Environmental, Social and Governance (ESG) factors are systematically integrated in the highly disciplined investment process, by using the ESG scores from the RobecoSAM Corporate Sustainability Assessment. The ESG integration aims for a total ESG score of the portfolio higher than the index. Moreover, the scores on the Environmental, Social and Governance dimensions should also be higher than the index, to ensure that the ESG enhancement is reached across all three dimensions. This ensures that stocks with higher ESG scores are more likely to be included in the portfolio while stocks of companies that have very poor ESG scores are more likely to be divested from the portfolio. With these portfolio construction rules we aim for an ESG profile of the fund that is above average compared to its peers. In addition, stocks with corporate governance issues or stocks that have major litigation or regulatory risk may be excluded from the investable universe. Next to ESG integration, Robeco has an exclusion policy and conducts proxy voting and engagement activities based on International Corporate Governance Network objectives.

Sector allocation

The Robeco Emerging Conservative Equity Fund (AUD) is not benchmark driven. It uses a quantitative stock selection model for bottom-up selection of stocks with low absolute risk and high expected return characteristics. The current weights in defensive sectors are high compared to regular indices. This is due to the fact that these sectors contain a relatively large number of stable and attractively priced stocks.

Sector allocation	Weight	Deviation index
Financials	21.6%	2.4%
Information Technology	19.0%	-2.3%
Communication Services	13.5%	2.9%
Consumer Staples	9.8%	4.0%
Consumer Discretionary	7.5%	-7.7%
Industrials	7.1%	2.1%
Energy	6.7%	1.4%
Utilities	6.4%	4.2%
Materials	5.4%	-3.5%
Real Estate	2.2%	0.4%
Health Care	0.8%	-3.9%
Other	0.0%	0.0%

Country allocation

The Emerging Conservative Equity Fund (AUD) is not benchmark driven. It uses a quantitative stock selection model for bottom-up selection of stocks with low absolute risk and high expected return characteristics. The current weights in certain countries are high compared to regular indices. This is due to the fact that these countries contain a relatively large number of stable stocks, which are attractively priced.

Country allocation	Weight	Deviation index
China	25.7%	-8.2%
Taiwan	23.5%	8.7%
Korea	10.2%	-2.8%
India	7.8%	-3.9%
Russia	7.8%	4.2%
Malaysia	4.5%	3.2%
Saudi Arabia	4.3%	1.1%
Mexico	3.7%	1.7%
Brazil	3.6%	-1.4%
Turkey	2.5%	2.2%
United Arab Emirates (U.A.E.)	1.6%	0.8%
Qatar	1.0%	0.3%
Other	3.8%	-6.0%
