The performance data quoted represents past performance. Past performance is not a reliable indicator of future performance. Returns greater than one year are annualized unless otherwise specified. Returns are presented net of fees and are based on end of month hard close redemption prices assuming the reinvestment of all distributions and capital gains. Net performance is calculated after the deduction of actual trading expenses and is net of taxes withheld on foreign dividends, interest and capital gains. Net performance deducts the stated management fee of 0.75%, which includes management and other administrative fees (custody, legal, administration, audit and organisation fees). Current Fund performance may be lower or higher than quoted performance. The investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost. There can be no assurance that the Fund will achieve its investment objective. The return data contained in this document is calculated by a data provider whose calculation methodology may result in Fund returns that are lower or higher than the returns quoted in Fund reports.
