## Fund update

The BT Wholesale Multi-manager Conservative Fund produced a positive return over the month of May.

Equity markets continued to rally over May despite the first signs of increasing inflation in the global economy. Shortcomings on key employment numbers helped fuel investors' expectations of continued monetary support, pushing risk assets higher and keeping yields at similar levels to April.

The domestic equity market, as represented by the S&P/ASX 300 Accumulation Index, gained 2.3% over the month. International Equities, as measured by the MSCI World ex Australia Net Return AUD Hedged Index, gained 1.0%. Unhedged international equity exposure returned 1.2%, outperforming hedged exposure due to a slight depreciation in the Australian Dollar against the basket of developed market peers, despite minor appreciation versus the US Dollar. Emerging market equities outperformed developed markets in AUD terms, with the MSCI Emerging Markets Net Total Return Index returning 2.1%.

Listed property also performed strongly with the S&P/ASX 300 A-REIT Index returning 1.8% and the FTSE EPRA/NAREIT Developed AUD Hedged Net Total Return Index returning 1.4% over the month.

Bond yields have plateaued since the beginning of the March quarter. The Australian 10-year government bond yield drifted 4bps lower to 1.71% over the month and the US 10-year Treasury yield also moved 4bps lower to 1.59%. Credit spreads slightly narrowed over the month. As a result, the domestic fixed interest market, as represented by the Bloomberg Ausbond Composite 0+ Yr Index, returned 0.3% and the International Fixed Interest as measured by the Bloomberg Barclays Global-Aggregate Total Return AUD Hedged Index, returned 0.2%.

Funds with higher allocations to growth assets yielded higher returns to those with a higher allocation to defensive assets, due to stronger returns for growth assets.
