

AMP CAPITAL MULTI-ASSET FUND

Monthly communication — Platform

December 2021

The AMP Capital Multi-Asset Fund (the Fund) aims to provide solid, inflation beating returns, by investing in a portfolio of assets spread across different classes, sectors and geographies.

The Fund is actively managed and has the ability to change the portfolio's asset mix in order to navigate the ups and downs of the investment cycle. This may be of particular value to investors concerned about short-term market fluctuations.

This month in brief

Performance and positioning

The Fund produced a positive return in the December quarter and is above targets over one and three years. Performance was driven primarily by equities and real assets. Alternatives also contributed, while defensive assets, notably bonds and hedges, detracted. Contributions from active management in equities have also been very strong. We have increased protection within the Fund to soften the impact of any larger than expected drawdowns through holding options in US high yield debt and Australian equities.

Portfolio activity

The portfolio is positioned conservatively as we enter 2022. Average equity exposures are approximately 40% of the portfolio, with a lean towards active stock selection in non-US developed equity markets and real assets. Meanwhile, alternative strategies total approximately 22%, while bond and credit exposures remain relatively low. We have a focus on further developing the range of absolute return strategies and we expect to introduce some of these in 2022. In a market that has been dominated by low interest rates, ever higher valuations in the US, and historically-low return expectations from mainstream markets, expanding the scope of alternatives from both existing and new partners is both a priority and a key point of difference of our goals-based funds.

Outlook

In our view, 2022 offers a host of risks and opportunities. For example, we believe commodities markets present opportunities, given the current themes of underinvestment, decarbonization and COVID-related disruptions. Regarding risks, we feel these are focused around tightening monetary policy, geopolitics, climate and China. Perhaps the greatest positive theme, however, is the potential for COVID-19 to finally be forced into relative submission through the combined forces of medical progress, immunity and milder mutations.

INVESTMENT OBJECTIVE

The Fund aims to provide a total return (income and capital growth) before costs and before tax, of 4.5% pa above inflation, the Reserve Bank of Australia inflation rate (Consumer Price Index) - trimmed mean (published on www.rba.gov.au), on a rolling 5 year basis. In addition, we aim to deliver indicative volatility rate of 4-8% (bond-like) over rolling five years. We aim to deliver this in a manner that is as efficient as possible (with respect to risk and cost) within the bounds above.
