Unlisted Infrastructure	1.44%
Fixed Income – Australian	15.33%
Fixed Income – International	22.08%
Other – Defensive and Growth Alternatives	2.69%
Cash	8.19%

## CONTRIBUTION TO EXCESS RETURN<sup>4</sup>

## FUND UPDATE

The Advance Moderate Multi-Blend Fund produced a positive return over the month of July.

Equities markets traded more cautiously during the month with concern around enduring inflation, slowing global recovery due to the Delta variant and earlier than expected policy tightening. Most developed market equity indices ended the turbulent month in positive territory, supported by central banks' dovish stance on monetary policy and data from the UK showing the effectiveness of vaccination against hospitalisation.

The domestic equity market, as represented by the S&P/ASX 300 Accumulation Index, gained 1.1% over the month. International Equities, as measured by the MSCI World ex Australia Net Return AUD Hedged Index, gained 1.8%. The Australian Dollar depreciated against most major currency peers affected by a retreat in commodity prices, extended COVID lockdowns across Australia and risk sentiment. Unhedged international equity exposure outperformed hedged exposure and returned 4.0%. Emerging market equities returned -4.7%, as measured by the MSCI Emerging Markets Net Total Return Index, the cause: a contagious sell-off in Hong Kong and US-listed Chinese stocks triggered by China's new regulatory crackdown on education companies, in addition to its ongoing scrutiny on IT companies.

Global listed property performed strongly with the FTSE EPRA/NAREIT Developed AUD Hedged Net Total Return Index returning 3.9% over the month. Domestic listed property, as measured by the S&P/ASX 300 A-REIT Index, returned 0.5%.

Bond yields pulled back over the month, signalling heightened concern about the growth outlook vis-a-vis long-term inflation. The Australian 10-year government bond yield moved 35bps lower to 1.18% over the month and the US 10-year Treasury yield moved 25bps lower to 1.22%. Credit spreads remained flat. As a result, the domestic fixed interest market, as represented by the Bloomberg Ausbond Composite 0+ Yr Index, returned 1.8%; and the International Fixed Interest as measured by the Bloomberg Barclays Global-Aggregate Total Return AUD Hedged Index, returned 1.3%.

Similar returns across asset classes resulted in funds with higher allocations to growth assets performing in line with those with a higher allocation to defensive assets.
