Cash	5.20%

CONTRIBUTION TO EXCESS RETURN⁴

FUND UPDATE

The Advance Balanced Multi-Blend Fund produced a positive return over the month of October.

Risk sentiment remained positive over the month, supported by strong corporate earnings announcements. High energy prices continued to be the near-term inflationary driver with supply chain issues persisting, exacerbated by extreme weather.

The domestic equity market, as represented by the S&P/ASX 300 Accumulation Index, gained 0.1% over the month. International equities, as measured by the MSCI World ex Australia Net Return AUD Hedged Index, gained 5.4%. The AUD appreciated against major global peers, as a result, Unhedged international equity exposure underperformed hedged exposure, returning 1.7%. Unhedged emerging market equities returned -2.9%, as measured by the MSCI Emerging Markets Net Total Return AUD Index.

Domestic listed property, the S&P/ASX 300 A-REIT Index, returned 0.6%, adding to the strong performance in September. Global listed property as measured by the FTSE EPRA/NAREIT Developed AUD Hedged Net Total Return Index, delivered a strong return of 5.6% over the month.

Market expectations on inflation further increased alongside Federal Reserve Officials highlighting the risk of a possible persistently elevated inflation and setting the expectations for bond buying tapering to start in mid-November to mid-December. The US 10-year Treasury yield moved 7bps higher to 1.56% at the month end, as a result, International Fixed Interest as measured by the Bloomberg Barclays Global-Aggregate Total Return AUD Hedged Index, returned -0.3%. The Australian 10-year government bond yield surged up 60bps to 2.09% at the month end due to a significant sell off in the Australian fixed interest market, which was triggered by the RBA not defending its Yield Curve Control policy target for the short end of yield curve. The Bloomberg Ausbond Composite 0+ Yr Index was down -3.6% over the month.

Funds with higher allocations to growth assets yielded higher returns to those with a higher allocation to defensive assets, due to stronger returns for growth assets.
