Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The growth orientation of the Trust means it has a greater exposure to growth assets (such as Australian and international property and shares and alternative – growth), with a moderate exposure to defensive assets (such as cash, fixed interest and alternative – defensive).

The Trust is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers may utilise strategies for the management of currency exposure.

The level of currency hedging used for the Trust will vary from time to time. The Trust has the capacity to change the level and nature of the currency overlay to manage the Trust's currency risk.

- The fixed interest portfolio outperformed its benchmark due to active duration managers and overweight to credit.
