Investment strategy

IOOF MultiSeries 90 (Trust) gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The high growth nature of the Trust provides a majority exposure to growth assets such as property, Australian and international shares and alternative assets, with a lesser exposure to defensive assets, such as fixed interest and cash.

A mix of passive, factor based and active investment managers may be selected to manage the assets of the Trust providing differing yet complementary investment styles to achieve more consistent excess returns.

The Trust is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the Trust's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the Trust that international currency exposure may be hedged. The Trust has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

Quarter highlights as at 31/03/2023

- There were no changes to the manager line-up over the quarter.
- The international shares portfolio outperformed its benchmark with good performance from the underlying managers.
- The alternative growth and defensive portfolios outperformed their benchmarks with good performance from private equity, private credit and infrastructure managers.
- The Australian shares portfolio outperformed its benchmark with managers holding fundamental quality exposures outperforming the broader market.
- An underweight to international equities detracted as the asset class produced strong returns.
