October 2021

welcome to brighter

Financial markets update

Global equity markets regained momentum over October, recovering from the prior month's weak performance. The global economic situation remains the same with high inflation and supply chain constraints causing concern as central banks begin to tighten policies. However, investors remained optimistic on the back of the strong earnings season.

Over October, Hedged Developed Market Overseas Shares posted strong positive returns of 5.4% with many equity indices reaching new highs. Earnings growth continues to provide support to fundamentals as we saw equity market volatility decline significantly over the month and a return to risk-on sentiment. With a majority of companies having beaten analyst expectations, investors now expect a strong fourth quarter. Chinese markets finally rebounded over the period as concerns over the Chinese property sector stabilised. However, this was not enough to offset the weaker performance across the rest of Asia and Brazil, hence the region lagged for the month with Unhedged Emerging Markets returning -2.9%.

Fixed income markets were volatile over the month as markets continued to price in a faster pace of monetary policy tightening. Domestically, the third quarter CPI figures were higher than the RBA's and broad market expectations, triggering a domestic bond sell-off and Australian 10-year government bond yields rising considerably. Consequently, Australian Government Bonds returned -3.8% over the month.

Returns for Australian Shares were muted over October, with the S&P/ASX 300 returning 0.1% and considerably underperforming Hedged Developed Market Overseas Shares. All other domestic indices provided similar returns except for the S&P/ASX Small Ordinaries, which was the best performer, returning 0.9%. IT (2.4%) was the leading sector over the period, driven by a small growth rally towards the end of the month, evidenced by the relative performance of Xero (7.5%) and Afterpay (1.5%). The worst performing sector was Industrials (-3.2%), which is heavily weighted towards travel names such as Qantas (-5.7%) and Sealink Travel (-18.0%).
